

Relief Material Distribution

Pahichan Nepal distributed relief materials including food package, warm clothes, blankets, sanitary packs to the needy people and person with disability inside and outside Kathmandu valley. Inside Kathmandu valley, we reached in the places like; Lokanthali, Thimi, Satdobato, Talchhikhel, Kapan, Dhapakhel whereas, outside the Kathmandu valley, we reached in the Mahottari, Rautahat, Bardibas, Siraha, Sarlahi, Bara, Dhanusha districts.

In the course of relief material distribution outside the valley, we found some of the major social issues like; gender discrimination, lack of awareness in family planning, reproductive rights and health, lack of quality education, dowry system. In spite of being on poverty, women are forced to conceive a baby until they bear a boy child. Women are unaware about their reproductive health which leads to the major health problem in the future.

Whereas, inside the Kathmandu valley, we found that most of the person with disability are unemployed and seeking for a better opportunity. The importance of resourceful and skill based training is found in the Kathmandu valley. Also the prevailing attitude toward person with disability in the society is still unhealthy and deviant and didn't allow to contribute or participate in any sort of activities.
